

Leverage the Power of Unified Communications

CNG Unicom delivers powerful new ways to communicate and collaborate

The CNG Unicom Difference

Imagine your employees, customers, suppliers and partners communicating and collaborating seamlessly, in the office or anywhere in the world. Imagine great new ways to reduce costs, improve productivity and interact better with your customers. And imagine employees with greater flexibility, enabling a better balance of work and life.

Enhanced communication and collaboration means real competitive advantage

Unified Communications (UC) combines voice, data, e-mail, video and mobile applications into a single, unified system with powerful new business tools to gain a true competitive advantage.

- **Collaborate anytime, anywhere** -- Your employees' workspaces are anywhere they are, so co-workers, partners and customers can collaborate instantly and effectively.
- **Accelerate the speed of business** -- Sophisticated capabilities like presence, instant messaging and rich media services ensure that information reaches the right person, right away. This dramatically speeds business processes, and improves employee productivity.
- **Dramatically improve business processes** -- Enjoy the ability to transform and improve business processes like ERP and CRM for new levels of customer satisfaction, business agility and innovation.

Empower people to choose when, how, where and with whom they communicate

The entire Unified Communications system is integrated on a single Internet Protocol (IP) network, providing an intelligent platform for effective, collaborative, scalable and secure communications. UC gives employees the power to become more effective and productive.

- Stay accessible anytime, anywhere with a single unified phone number.
- Use presence information to locate colleagues and determine the best way to communicate with them.
- Receive voice, e-mail and fax messages on a single device, wherever they are.
- Share files and applications, and arrange virtual meetings.
- Collaborate with audio, web and video conferencing for an in-person experience.

A leading financial institution called on CNG Unicom for help with its IT environment. More than just a solution provider, CNG Unicom did an extensive evaluation of the IT infrastructure and audit of communication system hardware.

That groundwork turned up more than \$1 million per year of savings by eliminating unused circuits and redesigning legacy networks to take advantage of more modern and cost effective options. With these findings, we worked with the bank to modify its infrastructure to save money and improve efficiency. The result: a significant impact on the bank's IT systems ... and its bottom line.

That's the CNG Unicom difference!

CNG Unicom ... acknowledged expert in the power of Unified Communications

CNG Unicom is a leading provider of industry-standard Cisco Unified Communications solutions. With many successful implementations to our credit, we understand the communication challenges facing today's businesses, and work with customers to leverage Unified Communications to turn those challenges into business opportunities ... and true competitive advantage.

"When we saw what they had to offer, the decision was made quickly. They had everything we needed; CNG Unicom's Cisco solutions solved each of our issues," he says. "CNG Unicom's staff goes above and beyond to ensure customer satisfaction. We were confident that by selecting CNG Unicom's Cisco solutions we would be able to take a giant leap towards simplifying and improving our communications infrastructure."

– Ahmed Shariff, IT Director, Enterprise Infrastructure at Platform Computing

More than Unified Communications ... CNG Unicom also leverages deep expertise in related technologies to provide customers with a holistic view of the network, and an understanding of how UC best fits into their unique environment. Our team's extensive expertise includes:

- Technology Strategies
- Network/Server Architecture
- Voice over IP (VoIP) and Video over IP
- Network Security
- Wireless Networking
- Mobility Solutions
- Data Centres including Virtualization
- Enterprise Storage

CNG Unicom is a trusted advisor and partner for comprehensive Unified Communications systems.

Take advantage of the CNG Unicom difference

"CNG Unicom staff makes a serious effort to understand the customer's business by leveraging the expertise we have in our own business."

– Paul Reynolds, President, CNG Unicom

At CNG Unicom, we offer more than industry-leading Unified Communications expertise. We take a holistic approach to truly understand our customers' business challenges and opportunities. This approach ensures the new system meets and exceeds objectives ... and delivers true competitive advantage. This dedication to our customers is truly the CNG Unicom difference.
